

PUMPKIN

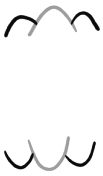

Halloween pumpkins, also known as jack-o'-lanterns, originally came from an old Irish legend about a man named Stingy Jack. People carve spooky faces into pumpkins and light them with candles to scare away any mischievous spirits that might be lurking around on Halloween night!

1.

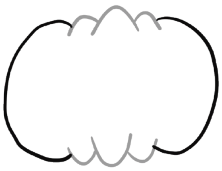

Start with two arches to define the height of the pumpkin.

2.

Add more curves for the pumpkin's ridges.

3.

Complete the pumpkin shape by drawing curved lines on the sides.

4.

Add carved eyes and a triangular nose.

5.

Draw a spooky smile and a stem.
